

Cheaper, simpler wheel inspections

Hocking NDT have designed the WheelScan LT, a compact wheel inspection unit, designed to test for cracks and corrosion in a variety of wheels over a wide range of industries. Benefits include:

- Supports wheels up to 75kg and 450mm in diameter
- Designed for easy relocation
- Variable wheel rotation speeds
- Fast scanning speed
- Wheel clamping and securing

Building on the success of the fully automatic WheelScan Mk IV, WheelScan LT offers a more cost effective solution for small, lower volume wheel inspection.
